

Code: VGA+Y+V+AU/HDMI

## CONVERTER **VGA+Y+V+AU/HDMI**

Converts VGA signal or Component Video (YPbPr) signal + 2 Audio (Stereo) channels to HDMI signal. Converts VGA, CVBS signal or Component Video (YPbPr) signal + 2 Audio (Stereo) channels to HDMI signal.

|                                        |                                                                                                                                                                                                                                                                          |
